A Suggestion.
The National Fair will bring a grand holiday to our city, and the children and teachers of our public schools should have an opportunity to share in the festivities of the occasion. It is suggested, therefore, that the schools be closed on one or more regular school days during the Fair season for that purpose. It would be a beautiful feature of the grand procession at the formal opening if each school should be represented by one girl for each State and Territory, neatly attired and grouped upon a platfory again, which the representing the platform spring vehicle, thus representing the educational interests of the District in the National Fair opening. At least it is to be hoped that the managers of the educational interests of the District will feel justified in closing the public schools for one or more days during the Fair to give the rising generation an opportunity to participate in the enjoy-ments and instructions of that affair.
